

THIS EDITION, WE WANT TO SHINE THE SPOTLIGHT ON THE TEAM @ADDENBROOKE'S HOSPITAL, CAMBRIDGE, WHO HAVE JOINED US AS OUR NEWEST RECRUITING SITE, AND HAVE COME SPRINTING OUT OF THE GATES WITH 5 PATIENTS IN, IN THEIR FIRST MONTH OF RECRUITMENT ! HUGE CONGRATULATIONS TO THE TEAM AT CAMBRIDGE

Some words from the team: "We are excited to join the EVIS site teams and are pleased that our efforts so far have led to a good start to recruitment.

Set-up was an intensive process that required a significant amount of discussions with our ITU colleagues. This has prepared the way for a seamless (so far!) recruitment pathway whereby our patients on the Norad arm go to HDU/ITU or are weened off in ED.

We have carried out ED training so our clinical team have been fantastic at highlighting potential cases and we have often managed to get in there early to document the first set of obs.

The EVIS trial team have also been really helpful in responding to our many questions, so all in all success has been largely related to great team work! "
